MIS VISION

To use holistic means to create surrounding that nourish humans' senses, health, and mind.

A future for everyone to live in harmony with nature.

Aykah, is both our interior design consultancy name, and is an Arabic term for a deeply rooted, densely leaved, long lasting tree

We in Aykah take great care to understand the roots of the different nature of people, in terms of how their senses interact with the surroundings; to feel at-most well being and thus enhance their quality of life and productivity.

We take our time to holistically care what space occupants feel during the hours they spend in a day, be it a home or office.

The product, though may not seem conventional, is a space that is in continuum with nature and the occupant's very biological and spiritual being--leading not only to greater harmony with surroundings but yet better health and productivity.

We do that inspired by AYKAH where we root the design deep in who you are, and we strive to do dense work to give you a soothing life.

HOLISTIC INTERIOR DESIGN

The design of this basement living room portrays the HID elements with a full biophilic environment.

Private Villa - Basement
KSA

It uses a mirror to reflect the light from the window with the addition of interior plants and faces an aquarium. It also has a water channel, which is an extension of the outdoor pool, covered by glass.
